POSTDOCTORAL RESEARCH FELLOW

A Postdoctoral Research Fellow is sought by the LEQUIA-UdG (Chemical and Environmental Engineering Laboratory from the University of Girona) to work on the EU-LIFE project CLONIC (<http://www.lifeleachate.com>). The project will be undertaken jointly by the LEQUIA-UdG and the Microbiology Research Group from the University of Girona.

The fellow will work in a team consisting of the project chief investigators, three postgraduate students and as well as several engineers from the industry partners of the project (see project webpage). Responsibilities of the position include participating in the design and undertaking of control and modelling applications using Matlab/GPS-X and Labview/Labwindows software to be applied in lab reactors.

The fellow is required to have a PhD degree in the area of control and automation, biotechnology or closely related areas with extensive experiences in wastewater systems. Fundamental understanding of biochemical processes in wastewater treatment, experience in data acquisition and processing, process modelling and computer simulation are essential. The fellow is also expected to have excellent interpersonal skills.

The position if offered for a term of two years. The salary will be in the range of 22.000 to 26.000 € per year. Position will start no later than September 1st, 2004.

If interested in this position, please contact Dr. Jesús Colprim (e-mail: J.Colprim@lequia.udg.es) for further information or browse project website. Applications should be submitted either electronically or to LEQUIA-UdG. Deadline for applications is May 31st, 2004.
